

Liquid & Powder Enhancements Removal

1 HOUR Enhancements do not need to be removed periodically for the health of the nail. However, should a client wish, Liquid & Powder Enhancements can be removed safely in about 30-40 minutes.

STEP 1:

Cleanse Hands

1. Have the client wash their hands with liquid soap and warm water. Towel dry.

2. Massage **COOLBLUE®** Waterless Hand Cleanser into the client's hands to cleanse skin and help prevent transmission of germs.

STEP 2:

Reduce the Enhancement

1. Reduce the entire enhancement with the **Blizzard™ File**, leaving a thin layer of product.

STEP 3:

Apply Cotton and Foil

1. Apply cotton that has been **saturated** in **CND® SHELLAC® Nourishing Remover** to each nail and **wrap entire fingertip** with foil. This will allow the product to warm to body temperature and speed the removal process.
2. Allow **30 minutes for the CND® SHELLAC® Nourishing Remover** to "swell" the molecular chains in the enhancement making the coating very soft (like rubber).

STEP 4:

Remove Cotton and Foil

1. Remove the foil from the nails and wipe each nail with a clean disposable towel. Remove the soft product with an orangewood stick and use the **240 grit of the Koala Buffer™** and buff the rest of the enhancement off; taking care not to file the natural nail. Complete the process with a **Girlfriend™ Buffer**.
2. Wash both your and your client's hands and condition the nails and skin with **SOLAROIL®** Nail and Cuticle Conditioner.

3. Prescribe a home care program that will support the health and beauty of the nails. This is a great opportunity to up-sell the client into a regular natural nail care program, or alternative enhancement service.

PRODUCTS REQUIRED

COOLBLUE®

CND® Files and Buffers

CND® SHELLAC® Nourishing Remover

SOLAROIL®

ACCESSORIES/EQUIPMENT REQUIRED

Hand Towel

Hand Soap

Cotton

Foil

Disposable towels

Orangewood stick

Timer
